

**HELPS PEOPLE FIND EACH OTHER IN ANY SITUATION,  
MASS CASUALTY/EMERGENCY OR MASS GATHERING**

HC Family Reunification™ allows first responders or event employees to gather information from people or families who have become separated in a crowd, mass casualty, or emergency event.

Users may easily collect information including audio/video from either the lost person or those looking for a lost person. The information is gathered and synchronized in near real-time and gives emergency workers full situational awareness to help locate and reunite people during and after an event.

HC Family Reunification™ helps reunite families or people by tracking either one. The information gathered about any lost party is maintained and shared in near real-time across HC Standard®.
